

Task 1

Name a desert that is in each of these continents:

Africa Kalahari

North America

Asia

Australia

South America

Task 2

Fill in the gaps:

The 3 ways deserts can form are:

- 1) _____ cells (6)
- 2) Rain _____ (6)
- 3) D _____ (15)

Give an example of each type.

Task 3

Choose one of the ways that deserts can form. Write a few sentences explaining how it works.

WAGOLL

A rain shadow can create desert conditions. A large range of mountains forces moist air upwards and rain will fall on the high ground. The wind may carry the air over the area behind the mountains but there is no rain left to fall. The area behind the mountains can become a desert.
